

STOP WORK POLICY

ENPROSERVE (M) SDN BHD (EMSB) is committed to taking all necessary and practical measures to reduce or eliminate occupational health risks, injuries, and damage to property or environment.

Every employee, including partners and subcontractors, shall stop work immediately when faced with a situation that presents a threat that can harm themselves and/or others or adversely affect property and environment. This action is fully supported by EMSB management, with no fear of blame or retaliation if done in good faith.

Work will only resume once the hazard is addressed and received approval from an authorized individual, such as immediate supervisor or the designated accountable person at the worksite.

All employees, partners, and subcontractors shall consistently support and comply with this policy.

A handwritten signature in black ink, consisting of a long horizontal stroke with a loop at the end and a vertical stroke on the left.
